
"Scientia", rivista di scienza

MLN pioneered the introduction of contemporary continental criticism into American scholarship. Critical studies in the modern languages—Italian, Hispanic, German, French—and recent work in comparative literature are the basis for articles and notes in MLN. Four single-language issues and one comparative literature issue are published each year.

From Economists to Economists

Classe Di Scienze Morali, Storiche E Filolgiche

This book contains 12 essays which examine the international diffusion of Italian economic thought in 8 countries, namely England, France, Germany and Austria, Portugal, Spain, Sweden and the United States. Using different approaches, the contributors to this book discuss the international reputation of Italian economists between 1750 and 1950. This reconstruction of the flow of ideas from economists to economists provides original insights on the intellectual network (including institutions, learned societies, specialised journals and political authorities) in which Italian economic thought was transmitted and circulated. It also serves to measure and explain the specific degree of influence which Italian economists managed to exert within different international contexts and among different groups of scholars. Galiani, Verri, Beccaria, Pantaleoni, Pareto, the Italian school of public finance and the Italian Economists in the interwar years are some of the authors whose reputation, knowledge and influence has been thoroughly investigated in these essays.
